Message from Chairman

Our objective has been and will always be to maintain AI-Mashrik's leading role in the construction industry and maintenance, keeping it at all times ready to meet the new challenges of the construction's and maintenance growing demands, while continuing to improve the level and quality of services we always provide to our Clients.

Since its foundation in 1975, The Company has exerted every possible effort in developing its capabilities and boosting its performance, and has become more than ever a matter of pride and rejoice for us. In harmony with the company's goal, high regards were at all times placed to improve the quality of various resources such as systems, programs and high qualified personnel, carrying out the missions to the highest standards, using the most modern technology and advanced systems, staying always ahead of the latest innovations in the construction and maintenance industry.

We intend to maintain those standards by keeping our adopted philosophy of excellence for AI-Mashrik, in focusing on assuring quality and reliable operations, and keeping AI-Mashrik always able and ready to provide the highest level of service to our Clients, in the domain of special work such as infrastructures, Telecom, Energy, Power, Oil & Gas, in addition to Buildings, Bridges and Roads fields as well as maintenance of the same.

AI-Mashrik Co. (MASH) is an expert provider of complete solutions for the development and new construction as well as the modernisation and project management from planing to commissioning and a single source maintenance organisation.

You have a single partner who will provide a complete solution, quickly and reliably.

We extend our sincere thanks to those who has trusted AI-Mashrik, and gave us the opportunity to provide them our services, Keeping in mind that we will always convert your trust into enhancing quality of life.

Engr. Abdul Salam Al - Towajiri
Chairman

HISTORY

& general information

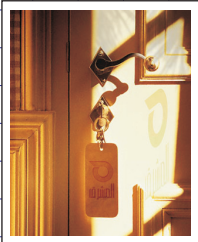

Al-Mashrik Company, founded in 1975, totally Saudi owned company with SR 20,000,000 fully paid capital and a statutory reserve of SR 15,000,000.

Strategically based in Riyadh. It is considered one of the leading construction and maintenance companies in the Kingdom of Saudi Arabia, that contributed greatly to the development and growth of the national economy.

Al-Mashrik has completed a significant number of sizeable projects in the field of Roads, Buildings, Infrastructures, Telecommunications, Electrical, and Mechanical works. Our capabilities were enhanced by continuing the process of undergoing foreign investment joint venture operations in the fields of Oil & Gas, Mechanical, Electrical, and Instrumentation for wide variety of projects with international companies, occupying a distinctive position of leadership in the industry.

We are confident to undertake, with full satisfaction, any large-scale projects with our efficient management, highly qualified & skilled engineers and sufficient latest machinery as well as the financial resources to meet the job requirements.

It is our target to keep **Al-Mashrik** Company as an enterprise financially healthy, technologically capable and has deep sense of responsibility in project implementation.

EQUIPMENT

Al-Mashrik Company's fleet of technological equipment meets the highest standards in quality and ensures smooth and speedy projects completion. The Company owns and operates various machinery and construction equipment, and it has continued over the years to invest considerably in updating its plant and equipment throughout its principal centers of operation.

All equipment meets the highest standards of quality, being periodically replaced to maintain first class performance and access to latest technological advances.

As each project is unique in its needs and aims, Al-Mashrik provides equipment carefully selected to achieve optimum results. From the initial day of a project, experienced company purchasers ensure reliable procurement and quality control. This service is maintained throughout the duration of the project.

Al-Mashrik carry out scheduled maintenance of all the Company's plants / equipment in it's own workshops which are fully equipped to the highest standards and employing fully qualified personnel.

Specialist heavy equipment includes a full range of pipe layers, bulldozers, graders, piling equipment, crantage, asphalt and concrete batching plants, compactors and welding machines.

Al-Mashrik Co. Commitment to quality is outlined as follows:

Policy Objectives

In order to fulfill our aforementioned quality commitments Al- Mashrik aims to:

- Review & develop the procedures, which constitute the back-bone of the quality system.
- Require from Al-Mashrik's staff full conformance to the quality system in their duties.
- Require quality concern and observation from the sub-contractors.

Quality Policy

In a highly competitive market where competence, quality and cost determine a company's position in the general field of operation & maintenance. AL MASHRIK Co. has established the Operation and Maintenance Department, in view of reaching the following objectives:

- ▶ Expand the range of its corporate experience & expertise through the O & M of facilities such as Air ports, Airbases, Universities, Utilities, Marine Terminals, Hospitals, Communities, Government Centers and Industrial Projects.
- ▶ Strengthen customer relationships by delivering quality driven services primarily directed towards customer satisfaction.
- ▶ Increase its share of the O&M market by providing cost effective services governed by management system compliant with the most advanced international standards.

With the aim of attaining these objectives and of achieving customer confidence in the provided service, a Quality Management System has been set up and is continuously applied to:

- ▶ Determine Customer needs and expectation and specify them in the form of defined requirements for the organization,
- ▶ Identify and provide resources needed to obtain optimum efficiency in delivering the required service,
- ▶ Determine, plan, carry out and monitor service realization processes,
- ▶ Define and implement control, analysis and improvement processes as means of ensuring that service conforms to specified requirements.

We, the management of the operation & maintenance department, are fully committed to ensure that this policy is scrupulously and efficiently communicated to all levels of the organization, permanently applied throughout the entire department, and that the related Quality Management System satisfies the ISO 9000 standard requirements.

HEALTH & SAFETY ■

The following plan is presented to indicate Safety Policy and scope of training offered by Al-Mashrik to maintain a vigorous accident prevention programme, thereby eliminating human distress and financial loss. We place great emphasis on this comprehensive programme which will be aggressively carried out throughout all levels of the company. The programme is administered by the Safety Officer, Safety Assistants and a Male Nurse.

The **Al-Mashrik** Organization's primary area of emphasis is on accident prevention. Knowledgeable and safety conscious employees utilizing good techniques and equipment are the cornerstone of the company's accident prevention policy. Accidents can be avoided by using good judgment and common sense. Our work force and supervisors are fully conversant with the recognition of hazards associated with their jobs and we insist that our employees work safely by complying with the necessary precautions. Our accident prevention scheme includes training and education too. Each new arrival in the company receives a safety indoctrination course administered by the Safety Officer which includes the proper use of protective equipment and outline of hazards which may be encountered on a particular job and a discussion on the individual responsibility in avoiding injury or damage, fire prevention with a demonstration of operating fire extinguishers, the rendering of primary first aid and the established driving policy.

We plan all projects to insure that they will be carried out with a high degree of safety for all concerned and that our work will be safe and productive. Our vital interest is to follow the established Al-Mashrik safety standards and methods of enforcing them, to ensure safe and healthy working conditions and to preserve human resources. All members of our management and supervisors of all grades are well aware that safety must take equal importance with cost and construction and that they have a moral and legal responsibility to follow standards as laid down for the project and Saudi Arabian law.

Our company Safety Officer and his assistants are responsible for achieving our goal of "NO ACCIDENTS" by conducting weekly safety meetings to improve existing work methods, daily jobsite inspections to recognize any unsafe condition and to insure that legal and contractual requirements affecting safety and health are complied with. The Safety Officer is also responsible for the investigation of any injury to personnel or loss or damage to equipment and material and to compile a monthly safety report. Prior to commencement of work arrangements will be made for first aid facilities to allow prompt attention to the injured in accordance with Saudi Arabian law.

■ ENVIRONMENTAL

| P O L I C I E S |

It is the Policy of Al-Mashrik Company, wherever it conducts activities and business, to ensure that strict operational procedures are identified to give proper regard to the conservation of the environment. In implementing this Policy Al-Mashrik Company fully recognize the importance of complying with the requirements of relevant local legislation and also promoting the appropriate measures to safeguard the environment for all whom may be affected directly or indirectly by the Company's operational activities.

The appropriate measure relate to the safety of operations undertaken by the Company's employees and sub-contractors. This includes the prevention of air, water and soil pollution, as well as the necessary precautions to minimize damage from accidents that may occur in the circumstances. The Company undertakes to continually review and seek to improve its operating procedures, equipment and other resources to comply with the following Environmental Policy:

All Company Employees will observe applicable environmental, health, hazardous material transportation and safety laws & regulations. Priority will be given to the protection of employees, the public, clients and the environment. Prior to any new or changes to existing operations the Company's line management will address any possible adverse environmental impacts before their implementation. The environmental impact of all materials in use or proposed for use in operations will be assessed in advance.

Strict control by line management responsible for operations shall be exercised on waste generation and onsite disposal together with toxic and critical pollutant emissions. Materials, which are considered of a hazardous nature to the employee, public or the environment shall be avoided, but, where their use is deemed necessary use shall be minimized. However, wherever possible such materials shall be replaced by alternative materials of an environmentally friendly nature.

Work activities shall be planned carefully to ensure that spills and unintended releases to the environment are avoided. The Company, through its line management, will promote environmental concern among its employees and seek to generate an overall awareness of the impact of their operational activities on the environment. All employees will be further encouraged to identify and promptly report potential environmental matters of concern to their senior management and / or the health, safety section.

The Company having acknowledged the importance of protecting the environment, will at all practical times seek to promote the efficient use of energy sources and maximize on conservation aspects.

RECOGNITION *Certificates*

The successful completion of projects in a very professional manner and to the utmost satisfaction of the Clients, the co-operation, accomplishment and loyalty shown as well as the supply of quality services has provided excellent customer satisfaction during and after execution of the Contracts and have contributed significantly to the goals set by our Clients.

This was expressed to Al-Mashrik through the appreciation and recognition certificates provided to the company as well as to its staff for their excellent performance & achievement during the implementation of the projects.

Mr. Akram N. Jabr

Projects Department Manager
Al-Mashrik Company
P.O. Box 6108
Riyadh, 11442

On behalf of Lucent Technologies International Inc. (Saudi Arabia Branch), I would like to express our appreciation and sincere thanks to Al-Mashrik Company and its staff for the excellent work provided during the implementation of TEP6 Outside Plant (OSP) in the Kingdom of Saudi Arabia.

Al-Mashrik has executed and completed various Access and Junction networks involving Copper and Optical Fiber Cable in a very professional manner in accordance with Lucent specifications and to the utmost satisfaction of Lucent. Al-Mashrik has provided quality Services and excellent customer satisfaction throughout the contract period.

Al-Mashrik has completed the contract requirements in its entirety in the stipulated time frame. This could only have been achieved by employing their manpower and machinery for 2 shifts continuously, working 20 hours per day.

The co-operation, accomplishment and loyalty shown by Al-Mashrik have contributed significantly to the goals set by Lucent Technologies International Inc. in Saudi Arabia and its customer Saudi Telecom Company.

We wish you further success and prosperity and look forward to further association with your company as opportunities arise.

Best regards,

Lucent Technologies International Inc.
